

Sailing boats go out at noon. The rest of the sea runs all night

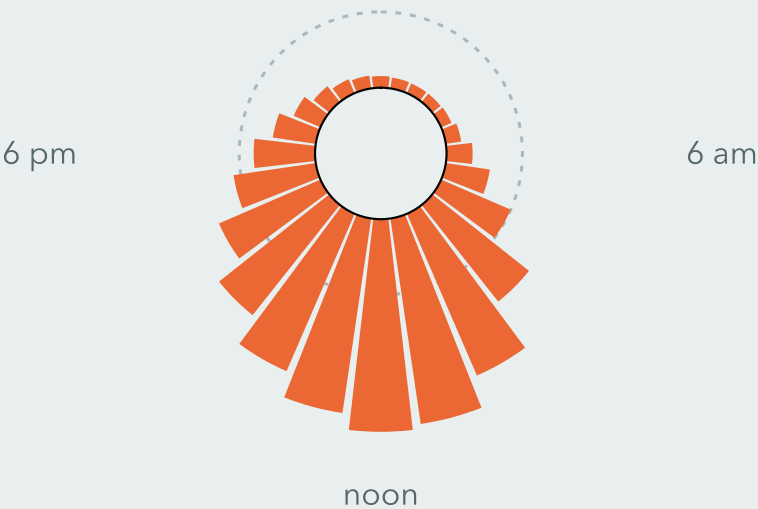

Where each fleet's movement falls across the day – Danish waters, six summers, local time.

How to read a dial: midnight is at the top and the hours run clockwise; the bar reaches further out the busier that hour is. The dashed circle is a day with no rhythm – 4.2 % of the movement in every hour.

Each fleet is measured against its own day – compare the shapes, never the sizes.

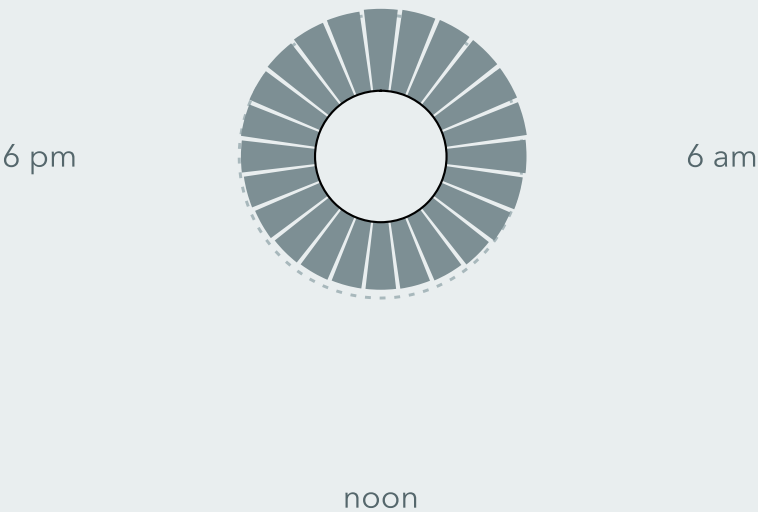

Sailing boats

busiest at noon · 11.7 % of its day
midnight

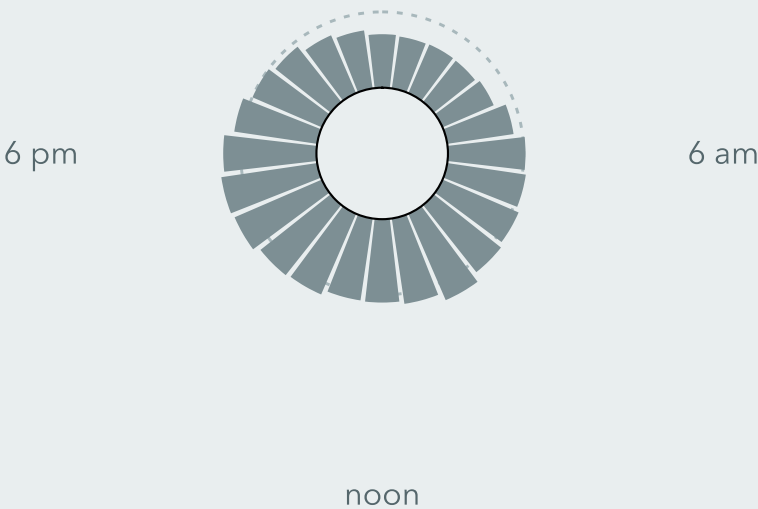

Cargo ships

busiest at 2 am · 4.6 % of its day
midnight

Ferries

busiest at 5 pm · 5.3 % of its day
midnight

Fishing boats

busiest at 5 am · 5.0 % of its day
midnight
